OBJECTIVE: Position in the Aircraft Maintenance/Management/Technical Field.

SUMMARY / OVERVIEW: Aircraft maintenance technician with extensive domestic and overseas experience, in the maintenance, modification, service and support of corporate jet aircraft worldwide.

## ACHIEVEMENTS:

- Managed and coordinated heavy maintenance inspections/modifications and repairs for company aircraft at various international repair facilities.
- Responsible for the training coordination and assignments of over thirty foreign national employees to conduct major airframe/engine inspections in a timely but safe manner.
- Received numerous Aviation Safety Awards for quality and safety achievements.
- Developed procedures to streamline aircraft maintenance inspections/repairs in an effort to reduce aircraft downtime.
- Planned, established and organized new turbine engine shops at Long Beach and Los Angeles locations.

## SKILLS/EXPERIENCE:

- Licensed FAA Airframe and Powerplant Mechanic with an FCC Class 3 Radio Telephone license.
- Experienced in the repair, maintenance, modification and inspection of a multitude of corporate type jet aircraft which includes but not limited to, Gulfstream IV, BAC 700, 800, Boeing 737-200, Fokker F-27, Dehavilland Twin Otters, Cessna Citation I, II, Rockwell Turbo Commander 680/690.
- As a Flight Maintenance Coordinator, flew worldwide with the Gulfstream IV in support of company corporate operations.
- As a manager, I was responsible for the operation of aircraft turbine engine shop and night operations of an aircraft service center with an awareness on budgetary constraints.

- Computer literate using Microsoft Word and Excel.
- Employs team player mentality.
